

DURACAR

Meet the new Duracar.

Technical specs

Homologation	L7e
WLTP	150 km*
Speed	85 km/h*
Climbability	20%
Motor Power	15 kW
Battery capacity	25 kWh Ion LFP
Consumption kWh/km	19 kWh/100km
Charging time 20-80%	45 min.
Max. DC charging	20 kW
Weight of chassis and cabin with battery	875 kg
Loading capacity	1000 kg
Turning Radius	4500mm
Brakes front and rear	Front discs, rear drums
Suspension front and rear	Coiled springs
Towing	Yes
Electric power steering	Yes
Tire size	165/65 R14
Seat	2
Size	3695 x 1490 x 2200mm
Wheel base	2000mm
Track width	1285mm
Vehicle warranty	2 years
Battery Warranty	5 years

*depending on chosen transmission **depending on DC charger

We go the driver's way

Becoming the driver's favourite LEV.

We developed our cabin with a clear vision in mind: creating a car suitable for any business while becoming the drivers' favourite LEV. A driver-centric approach that we call The Driver's Way. Providing a comfortable and confident experience in the car, enabling every driver to thrive and enjoy their time behind the steering wheel. So we put the driver first in every decision we make.

Our unique approach consists of four important themes. A golden combo that makes driving a Duracar safe and so enjoyable. Let's go the driver's way!

1. Perfect visibility

Driving a Duracar is all about feeling comfortable and confident. The large front and side windows create an excellent overview, providing situational awareness and confidence in driving. Features like a heated windscreen, electric heating and optimised air outlets prevent the windows from fogging up. A perfect view, no matter the weather conditions. We even equipped the Duracar with wide truck mirrors to eliminate blind spots.

Because seeing is better than guessing.

- Heated windshields
- All-around windows
- No blind spots
- Truck mirrors

2. Optimal Safety

You feel safe driving a Duracar. Period.

It's all in the name. The Duracar is built like a car, with a familiar steering and a frame designed to provide strength, stability and safety.

Our cars have excellent handling due to our low center of gravity and our breaks are powerful. The Duracar has great manoeuvrability, making city navigation and parking easy. Especially when adding the optional parking camera and sensors. The car is steady and firm. A perfectly balanced vehicle, even in strong winds. And the All Weather Tires keep you going in any weather condition.

The Duracar has a maximum speed of 85 km/h, which means that the drivers feel safe and secure driving through bigger city rings, even along freight traffic. Last but not least, we are able to adjust the Duracar's throttle response and torque, so we can offer an optimised vehicle for any traffic situation.

All these elements make sure the drivers return back home.

- Range of 150 km
- Automotive steering and pedal set
- All Weather Tires
- Low center of gravity
- Variable throttle response and torque settings
- Perfect manoeuvrability and easy parking
- Optional ABS and airbags

3. Great comfort

Every driver can sit comfortably in a Duracar. The spacious cabin is easily accessible, allowing quick in and out's for the driver.

Our cabine is equipped with an adjustable seat and steering wheel, that can be customised to any drivers' preference. We have chosen for a relatively bigger seat for the main driver due to the common practice of LEV's drivers working individually. For the co-driver, we installed a foldable seat that still meets all the safety requirements.

Our seats have great durability, making sure they remain comfortable throughout the years. The cabin provides enough storage possibilities. The floor and walls are double panelled; this isolation blocks out unwanted sounds and helps to regulate the interior temperature. This means a cool cabin in the summer and warm one in the winter. Keeping it comfy.

- Fully adjustable positioning of seat and steering wheel
- Durable material
- Spacious cabin
- Foldable co-driver seat
- Double panelled cabin isolation

4. Simple convenience

Waking up with a smile knowing that you are going to set foot in a Duracar. That is the feeling we strive for. So we installed a 7 inch tablet screen to display all essential information, plenty of storage possibilities, a first aid kit, coat hangers and high quality cup holders. Convenience, all over. The dashboard is designed with simplicity and consists of high quality materials. Vandal proof, because we understand that no one wants to drive in a used down car.

The Duracar has high quality speakers with excellent connectivity. Drivers can listen to their favourite music using bluetooth or any of the three USB ports. We offer plenty of charging possibilities for mobile devices. Everything you need to keep the business running.

We thought of it all. Driving a LEV has never been more fun.

- High quality Bluetooth speakers
- Great connectivity and charging possibilities
- 7 inch tablet display
- Vandal proof interior design

About Duracar

Built to be the ultimate Light Electric Vehicle (LEV) for last-mile delivery in urban zero-emission zones, Duracar is the extremely capable and manoeuvrable solution for transportation and delivery. Duracar aims to make the world a greener, healthier and safer space by offering drivers a comfortable and easy-to-manoeuvre electric vehicle. Duracar aims to be the new standard for delivery and transportation in urban area's, where zero-emission is becoming the new norm. The LEV is just the first step in Duracar's mission to accelerate the transition to a greener future where mobility solutions contribute to a cleaner, healthier and safer world.

We are always open for new partnerships that accelerate our mission to make inner-cities the greenest, healthiest and safest they can be. Let's shape a better and greener world together.
