

DURACAR

ELECTRIC PROFESSIONAL MOBILITY

Built for every urban task.

A complete L7e range for urban logistics, municipal services and specialist applications.

STANDARD · PRO · GENERATION III

PRODUCT BROCHURE 2026-2027

www.duracar.eu

BROCHURE DURACAR - REACH L7e

DIFFERENT PROFESSIONAL APPLICATIONS

L7e

- Designed and engineered by Duracar
- Manufactured by REACH

One electric platform. Multiple professional applications.

Choose a body and execution around the work - not the other way around.

Cargo & delivery

Examples:

- Liquid transport (500L/1000L)
- Open fixed bin (with hinged sides)
- Closed cargo box (many executions)
- Cooling & refrigeration box

Utility & municipal

Examples:

- Container tipper
- Movable bin
- Fixed plate
- Cleaning vehicle

Specialist applications

Examples:

- Food truck
- Fire intervention vehicle
- Wood/tree shredder
- Custom configurations

execution

Open Fixed Bin

CONFIGURABLE OPEN CARGO BED

AVAILABLE MODEL EXECUTIONS

STANDARD · from Q3 2026

PRO · from Q4 2026

GENERATION III · from Q2 2027

APPLICATION

For day-to-day transport of equipment and materials.

Some extra's:

Different side-rack possibilities

Cage set-up

Battery- and/or range extension

Model gen. III: extra light/strong composite cabin

L7e

execution

Open Movable Bin

SIDE TIPPER OR REAR TIPPER

AVAILABLE MODEL EXECUTIONS

STANDARD · from Q3 2026

PRO · from Q4 2026

GENERATION III · from Q2 2027

APPLICATION

For efficient transport and tipping of bulk materials in municipal and contractor work.

Some extra's:

Side-tipping configuration

Closed execution

Battery- and/or range extension

Model gen. III: extra light/strong composite cabin

L7e

execution

Container Tipper

TIPPER BODY FOR EFFICIENT UNLOADING

AVAILABLE MODEL EXECUTIONS

STANDARD · from Q3 2026

PRO · from Q4 2026

GENERATION III · from Q2 2027

APPLICATION

For loading, moving and unloading materials in urban operations.

Some extra's:

Open container body (till vertical tipp)

Hydraulic tipping mechanism shown

Removable container

Inspection doors

Battery- and/or range extension

Model gen. III: extra light/strong composite cabin

L7e

execution

Closed Cargo Box

WITH DIFFERENT DOOR CONFIGURATIONS

AVAILABLE MODEL EXECUTIONS

STANDARD · from Q3 2026

PRO · from Q4 2026

GENERATION III · from Q2 2027

APPLICATION

For protected transport of light or heavy cargo goods, in many different executions

Some extra's:

Extra strong, extra light composite

Solarroof panel

Light extra impact resistant composite floor

Battery- and/or range extension

Model gen. III: extra light/strong composite cabin

L7e

execution

Closed Refrigeration Box

WITH DIFFERENT DOOR CONFIGURATIONS

AVAILABLE MODEL EXECUTIONS

STANDARD · from Q3 2026

PRO · from Q4 2026

GENERATION III · from Q2 2027

APPLICATION

For goods that must remain frozen during distribution with fully heavy insulated body

Some extra's:

c

Battery- and/or range extension

Model gen. III: extra light/strong composite cabin

execution

Closed Cooling Box

WITH DIFFERENT DOOR CONFIGURATIONS

AVAILABLE MODEL EXECUTIONS

STANDARD · from Q3 2026

PRO · from Q4 2026

GENERATION III · from Q2 2027

APPLICATION

**For goods that must remain cool
during distribution with fully insulated body**

Some extra's:

Heavy duty composite based floor

Battery- and/or range extension

Model gen. III: extra light/strong composite cabin

execution

Food Truck

MOBILE CATERING VEHICLE IN DIFFERENT EXECUTIONS

AVAILABLE MODEL EXECUTIONS

STANDARD · from Q3 2026

PRO · from Q4 2026

GENERATION III · from Q2 2027

APPLICATION

For mobile catering, sales and service at urban locations and events with large service hatch and counter

Some extra's:

Purpose-built working interior shown

Roof and hatch solarpanel

Battery- and/or range extension

Model gen. III: extra light/strong composite cabin

L7e

execution

Fire Intervention Vehicle

COMPACT ELECTRIC RESPONSE VEHICLE

AVAILABLE MODEL EXECUTIONS

STANDARD · from Q3 2026

PRO · from Q4 2026

GENERATION III · from Q2 2027

APPLICATION

For rapid intervention with an on-board water reserve and high-pressure hose pump

Some extra's:

High-pressure hose-pump spray gun

Battery- and/or range extension

Model gen. III: extra light/strong composite cabin

execution

Cleaning Vehicle

MULTIFUNCTIONAL CLEANING OPERATIONS

AVAILABLE MODEL EXECUTIONS

STANDARD · from Q3 2026

PRO · from Q4 2026

GENERATION III · from Q2 2027

APPLICATION

For pressure cleaning, vacuum suction and related municipal service work.

Some extra's:

Vacuum-suction system with wastebin

Integrated equipment compartment

Battery- and/or range extension

Model gen. III: extra light/strong composite cabin

L7e

execution

Fixed Plate

FLAT LOADING BASIC FLOOR FOR TOOLS TO BE MOUNTED BY THIRD PARTIES (customer spec)

AVAILABLE MODEL EXECUTIONS

STANDARD · from Q3 2026

PRO · from Q4 2026

GENERATION III · from Q2 2027

APPLICATION

For mounting different tools and task-specific equipment.

Some extra's:

Adapted floor with weightsaving holes

Towbar

Special ECO trailer (light and low air resistance)

Battery- and/or range extension

Model gen. III: extra light/strong composite cabin

L7e

execution

Liquid Transport Vehicle

WITH CYLINDRICAL- OR RECTANGULAR TANK (500L)

AVAILABLE MODEL EXECUTIONS

STANDARD · from Q3 2026

PRO · from Q4 2026

GENERATION III · from Q2 2027

APPLICATION

For transport of liquids in 500L plastic tank

Some extra's:

1000L tank

Tank in stainless or normal steel

Filling- and emptying system

Battery- and/or range extension

Model gen. III: extra light/strong composite cabin

execution

Park/bush wood shredder

FOR SHREDDERING WOOD / BRANCHES

AVAILABLE MODEL EXECUTIONS

STANDARD · from Q3 2026

PRO · from Q4 2026

GENERATION III · from Q2 2027

APPLICATION

Shredding wood in urban areas

Some extra's:

Toolbox or wastebin

Leafblower

Battery- and/or range extension

Model gen. III: extra light/strong composite cabin

execution

AWP Cherry picker

FOR HIGHER ALTITUDE WORKS

AVAILABLE MODEL EXECUTIONS

STANDARD · from Q3 2026

PRO · from Q4 2026

GENERATION III · from Q2 2027

APPLICATION

For many off the ground activities

Some extra's:

Different executions in height and strength

Toolbox

Battery- and/or range extension

Model gen. III: extra light/strong composite cabin

execution

Duracar Generation III

ORIGINAL DURACAR HIGH QUALITY MODEL

AVAILABLE MODEL EXECUTIONS

GENERATION III · from Q2 2027

APPLICATION

Many different applications with boxes, utility equipment, etc.

Some extra's:

Cargo boxes with extreme high capacity upto 7 m³

Solar roofpanel on cabin and box

Side stickers on customers specification

Towbar

Two seats instead of middle seat

Battery- and/or range extension

Model gen. III: extra light/strong composite cabin

L7e

execution

Duracar – Reach L6e

IN MICRO EXECUTION HIGH QUALITY MODEL
(WITH CARGOBOX: 3m³ LOADING CAPACITY)
(REDUCED WIDTH OF ONLY 1.100 MM)

AVAILABLE MODEL EXECUTIONS

STANDARD · from Q3 2026
GENERATION III · from Q2 2027

APPLICATION

Different applications with boxes, utility equipment, etc.

For L6, no drivers licence needed

Some extra's:

Many extra's as in other models / executions of the L7e

Battery- and/or range extension

Model gen. III: extra light/strong composite cabin

Choose the execution that fits the job

The full range is presented across three planned execution levels

FROM Q3 2026

FROM Q4 2026

FROM Q2 2027

STANDARD

Base execution for core professional applications.

PRO

Top execution for more demanding configurations.

GENERATION III

Next-generation Duracar development for the European market.

Configuration, body, technical requirements and homologation are confirmed for each quotation.

Support is part of the vehicle

A professional electric fleet needs service, parts and clear commercial support

EUROPEAN SERVICE FOCUS

Local support for single vehicles and fleets

Sales and service partners across the European market
Specialist e-drive support backed by technical information
Parts logistics designed to keep professional vehicles working

INDICATIVE MODEL RANGE

**€15,000–
€25,000**

Final pricing depends on the model,
body, equipment, quantity and
selected options.

A separate quotation confirms final pricing and
commercial terms.
